

# USE GAS AT HOME?

## **THINK GAS**

Don't wait until something goes wrong

## **THINK SAFE**

Only use a Gas Safe registered engineer

## **THINK REGISTER**

Check the Register, check the card

An unsafe gas appliance in your home can put you and your family at risk of gas leaks, fires, explosions and carbon monoxide (CO) poisoning.

Gas Safe Register is the only official list of gas engineers who are registered to work safely and legally on gas appliances in the United Kingdom, Isle of Man and Guernsey.

Always use a Gas Safe registered engineer.
