

Gas safety in your home

You may only think about gas when something goes wrong, but having a badly fitted or poorly serviced gas appliance in your home can put you and your family at risk.

Gas Safe Register is the only official list of gas engineers who are registered to work safely and legally on gas appliances in the United Kingdom, Isle of Man and Guernsey. By law, all gas engineers must be on the Register.

Only use a Gas Safe registered engineer to fix, fit or service your gas appliances.

You can check that an engineer is registered on **GasSafeRegister.co.uk**, or by calling **0800 408 5500** and by checking their Gas Safe Register ID card.

Remember to also check that the engineer is qualified for the work you need doing.

Find and check a Gas Safe registered engineer at GasSafeRegister.co.uk or call 0800 408 5500

Licence No. 3456789

3456789

Keep your home gas safe

Follow these simple tips:

- ✓ **Have your gas appliances checked every year, by a Gas Safe registered engineer.**
- ✓ **Check for warning signs on or around gas appliances** (like soot or staining, excess condensation, lazy yellow flames, intermittent pilot light).
- ✓ **Don't DIY or use an illegal gas worker.** If they're not on the Gas Safe Register, they're working illegally and could be putting you at risk.
- ✓ **Carbon monoxide is a highly poisonous gas that you cannot see, smell or taste. Fit an audible CO alarm to alert you if it's present.**
- ✓ **Know the signs of carbon monoxide poisoning.** Seek help immediately if you're experiencing headaches, dizziness, nausea, breathlessness, collapse and loss of consciousness.

**Smell gas or suspect CO?
Call the gas emergency number:
0800 111 999**
